“ When I graduated high school, I went to work at Arrow. Lillie was working repairing the aluminum water pump housings. She trained me on that and a few other things. We had lots of conversations as we sat and worked on those. Even after the department split and I was on the other side we would still occasionally take breaks and have lunch together. I left Arrow before it closed, but I would still see Lillie around and we would talk for a few minutes. Lillie was always kind to me.
